Longevity consulting services
from Mercer

Longevity is the tool of choice for users who require the most powerful demographic risk analysis, particularly in the areas of mortality and longevity. As with any powerful tool, the best results can often be achieved with the assistance of a knowledgeable, and experienced, user. **Mercer's Financial Strategy Group** offers consulting with **Longevity** for clients who:

- need enterprise-wide consulting from a firm with a global reach
- demand immediate expertise of leading-edge techniques
- require peer-review of existing analysis.

Mercer's Financial Strategy Group has a dedicated team that brings considerable experience in turning **Longevity** modelling into high-quality output. Through close cooperation between Mercer and Longevity Limited, you can be assured of a seamless high quality service

Longevity is leading-edge software for modelling and analysing demographic risks, including mortality, longevity, critical illness, lapses and persistency. Longevity is an all-in-one analysis system, spanning automatic data preparation and validation, through to state-of-the-art survival modelling.

Mercer's Financial Strategy Group offers integrated multi-disciplinary services in pensions risk management. It works with finance and treasury departments to integrate pension scheme management into the broader financial management of their business. The group provides in-depth advice across a wide range of specialisms, including longevity consulting, actuarial and investment advice, broking, operational due diligence, bespoke insurance, covenant expertise and reinsurance.

Mercer is a member of MMC Group of Companies and is the only UK adviser to have a strong presence in each of these specialisms by drawing on advice from other member companies – Oliver Wyman, Marsh, Guy Carpenter and Kroll – which are each global leaders in their field.
